

Xperia Agent

Xperia Agent is an upcoming smart digital assistant developed by Sony with a display on its body. Even though Xperia agent is in its infancy stage, you can expect more features when it reaches the production milestone. Recently, Sony demonstrated the usage of the assistant paired with a Nestle smart coffee machine.

Ubi

Ubi is a voice-activated computer that plugs into the wall outlet. Once the connection is established, Ubi can call friends, send emails and monitor every room in your home.

Branto

Branto is a smart assistant, which provides 360-degree vision and control of your gadgets. It can see and hear everything that happens inside your home. The integrated 360-degree camera enables you to direct its angle from your smartphone. The Branto will automatically deliver notifications whenever it tracks anything which is unusual. The night vision mode enables you to view in complete darkness at night. It is possible to establish connectivity with either smartphone or Google Glasses.

Oomi

Oomi is a smart home system that features a noise detector, glass break detector, night vision, and a security camera with a 140-degree field of view including a temperature, vibration, light and humidity sensor.

Robot vacuum cleaners

Xiaomi Mi Robot Vacuum

The Xiaomi Mi Robot vacuum features 12 sensors, which can be used for various purposes. The Laser Distance Sensor (LDS) automatically scans the surrounding 360-degrees 1800 times per second to map out the interiors. The three processors integrated with the robot vacuum track movements in real-time. The efficient route for cleaning will be calculated by the Simultaneous Localization and Mapping (SLAM) algorithm. With the help of the Mi Home app, you will be able to switch on and control the robot remotely. You can modify cleaning modes and set schedules via the app. The Mi robot vacuum offers a powerful Nidec brushless DC motor
