

Bringing an interesting product mix

You can include 40 distinct types of home appliances in the fray including AC, water heater, lamps and even the fish tank.

Inoho

Inoho is yet another Indian startup in the home automation space with a product of their own. Using the product, you can control multiple devices including fans, ACs, geysers and lights from your smartphone. This can be

Control your devices from anywhere

done over the internet, thereby helping the user access the devices from practically anywhere in the world. The various functions that the Inoho system provides include scheduling an action and setting the mood for a place.

Silvan Innovation Labs

Yet another Bengaluru based home automation solutions firm, Silvan Innovation Labs came into being in 2008 and provides video surveillance, analytics and home automa-

tion solution products. Recently, they have also come out with four new smart-home consumer products. CBell - a Wi-Fi enabled video doorbell is one of them. The device calls on the owner's phone when the doorbell is pressed. Secure, an app-enabled security system is another offering, this one securing the home from intrusions as well as safety problems like fires and gas leakages.
