

Okay so where do I start?

Well, everything you need to know to start your YouTubing career is given in the subsequent chapters. You probably have an idea in mind about the type of content you want to do. So check out multiple similar channels, note down what they are doing, think of new ways to do it. If you don't have any idea, then go and explore YouTube. There are more than 500 million channels on YouTube with possibly every type of content you can imagine and you will come up with something or the other. Once done reading this FastTrack you will be armed with all the knowledge you need to become a successful YouTuber. Though there are some 'golden rules to becoming a successful YouTuber' that you should always keep a few things in mind:

- Know your target audience and what exactly they want
- Be authentic. Chances are there is already somebody doing what you are doing online. It's all about doing things differently.
- Don't try to be or do everything. Decide on what you want to focus on.
- Listen to what your viewers are saying. Interact with them and keep learning what you are doing right and what you are not.
- At the same time, don't get disheartened because of less views or some rude comments. Follow the golden rule of the internet: IGNORE THE TROLLS.
- Be creative and try new things. Many successful YouTubers started their own new trends which nobody thought would grow so huge in such little time.

Have fun while doing it. Well that is important right? **d**
