

For example, on a Witcher gameplay video, ‘Witcher’ will come before ‘RPG-game’.

Translations

You can enter a translated description for your video which will be visible to people who are using YouTube in that specific language, rather than the default translation. You can also buy Professional Translation for the same.

Monetisation

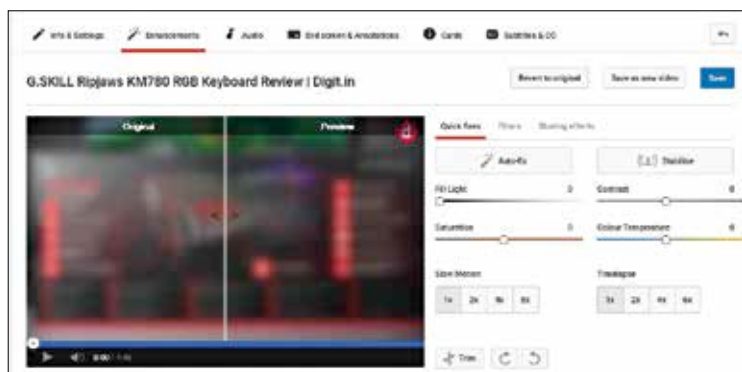

This section lets you chose the types of ads that will show on your video page, including ad overlays and skippable video ads. To find out more about the types of ads that can be shown on your video, checkout this lesson from the YouTube Creators Academy at <http://dgit.in/YTMonet>.

Advanced Settings

This section lists out a lot of advanced parameters related to your video. Some of the important ones include the ability to let people comment on your video and the default visibility of those comments, the content license for that video which lets you choose between Standard YouTube License and Creative Commons - Attribution, Syndication to allow the video only on monetised platforms, Distribution option to allow embedding, Specify if the video is in 3D and define parameters about the video and more.

Enhancements

The enhancements section lets you edit the visual appearance of your video

Use the enhancements tab for a quick fix
