

Estimated minutes watched

It's not only the information about the number of times the viewers watched a video that you get, you also get to learn how long viewers watch a video.

Subscriber, Likes and Comment activity

These parameters help you gain a clear picture of how much the viewers are interacting once they have watched a video and how many viewers are actively doing that.

Playback sources

The embedded player from YouTube helps viewers watch your videos without having to visit your site. Using analytics, you can get data regarding the number or people who watch your videos on your YouTube page as opposed to those who watch them on an embedded player.

Some (more) free YouTube programs and tools you can use

These free tools could also come in handy in your journey of being a YouTube video creator:

Even more great things to have!

YouTube Capture

Using this app, you can upload a video much faster on to YouTube. It also offers such features as automatic colour correction, trimming, stabilization and music tracks. Using this, you can also upload to different social media networks at the same time.
