

YouTube Enhance

Using Enhance, you can tweak/ add effects to the videos directly on YouTube. Even a one-click feature which enhances colour and lighting is available. Some other features include trim, stabilize, filters, slow motion and facial blurring.

Captions

As you must have guessed from the title, using this, you can add captions to the videos. On a related front, it must be said that addition of captions to the videos is a quick method to expand the audience, and also to possibly improve the search rankings.

Partner program

This provides multiple programs that would help you enhance the YouTube experience. With YouTube Partner Promotion, partner videos would appear along with a featured video, also offsite on the Google Display network and all across the Internet.

Annotations to Merch Store

Merch annotations give creators a way by which you can promote your licensed merchandise in your videos. If external annotations links are enabled, you have the option to create links from videos that would lead to approved retail sites on which the related merchandise would be sold.

Next Creator

YouTube NextUp is a development program aimed at helping new channels refine skills and also learn the requisite to take it to the fabled 'next level.' You get training, mentoring and promotion using the program.

On The Rise

This monthly promotional program is aimed at new YouTube partners. Partners are determined on the basis of their demonstration of strong original content, community support and optimization strategies.

YouTube Space

This was created so that YouTube creators could create original videos, jam with other channels, network, attend screenings and events and also avail great hands-on experience using cutting-edge production resources. To access this, you would have to create a large volume of content.
