

COPYRIGHT *and* Fair Use

FAIR USAGE POLICY

Producing videos might often require using snippets of someone else's work but be careful. You might get into trouble if you don't follow the guidelines.

You must have seen videos taken down from YouTube because of copyright infringement issues and at the same time seen people use other artists content in their videos without any problem. So what do you do when you want to use the latest Drake song in your next video? Do you contact him personally asking for permission
