

video, you get some money. More the number of clicks, and more the number of people watching these advertisements means more money for you.

It is one of the simplest and quickest way to earn money through YouTube, but remember the amount won't be significant, at least in the beginning. You need many subscribers and views to earn a substantial amount and hence most successful YouTubers have multiple sources of income with the money from advertisements being just one of them.

How do I become a partner?

It is very easy to join the YouTube Partner Program but before that you need a Google AdSense account to earn money from the videos and get paid, and your videos should meet the following minimum requirements:

1. The videos you upload should be advertiser-friendly. The ads YouTube puts on your videos are related to your content so that the people who come to watch your videos have a higher chance of clicking on the ads.
2. The content you are posting should be original. You can only monetize videos that has either completely original content or work by other artists which you have permission to use.
3. The videos you upload should comply with the Terms and Conditions of YouTube video uploads and follow the Community guidelines. So basically your videos shouldn't contain nudity, abuse someone, spread hate towards a person or community etc.

If your videos meet these requirements and you have an AdSense account you are all set to go. Follow these steps to join the YouTube Partner Program:

1. Sign in to your account
2. Click the account icon in top right corner and select 'Creator Studio'
3. Click on 'Channel' from the left menu, and select 'Status and Features'
4. Select enable under monetization
5. Follow the steps shown on the screen and accept the 'YouTube Partner Program' terms and conditions.

And Voila! You are all set now. You can now either choose to monetize all your videos or select individuals. All you have to do is go the Video Manager, select the Monetization tab and select the videos you want to monetize.

There are different types of ads that can be displayed and you get to choose which ones you want to enable on your video. Here is a brief about the different formats of advertisements offered by Youtube:

- **Display ads** - These are the advertisements that appear on the right of the video player and above the suggestions list in the browser window.
