

Veritasium

Veritasium takes a slightly different course from Minute Physics. Derek Muller started this channel in 2010 to debunk common misconceptions in science and to explain most physical phenomenon. He does a mixture of content, everything from documentaries, to short films, interviews, polls and illustrations to explain the various concepts in simple terms. While it may not be strictly educational, it lets you learn a few facts here and there. In his early videos, he is seen going around and asking people why certain scientific phenomenon occurs such as the moon appearing closer than it actually is, how a slinky does not actually defy gravity. He has now branched into showing the public the recent scientific inventions or discoveries, which are presented in an easy way for the public to grasp.

ASAP Science

ASAP science is a more recent channel started by Mitchell Moffit and Gregory Brown to explain the various phenomenon occurring in your body and around you. They explain these in a easy manner by using illustrations and multi colored graphical ele-
