

Nintendo GameCube had a very quirky design and few interesting titles to offer

Game titles

The 6th Generation of consoles marked a new trend in Game Development strategy by the various companies. Electronic Arts, Activision and other major publishers started developing cross platform games. The same titles albeit with a little modification were being released on all consoles.

Another major trend was the rise of ‘objectionable content’ like sex, violence and profanity. Games like Grand Theft Auto III and Vice City came under criticism for excessive use and display of them and for the first time serious thought was being put into rating games for their audiences .

Online gaming had already been getting popular on personal computers and this generation helped it become mainstream on the consoles too. Xbox came out with its own subscription based service called Xbox Live while PlayStation left it to the developers take care of it.

There were many notable titles in this era which included

- **Final Fantasy X** - Released on PS2, the company had mastered the genre of Role Playing Games by their game’s 10th iteration. The game was a huge success and set the record for the fastest selling RPG on consoles.
- **God of War** - God of War 1 and 2 were titles exclusive to PlayStation 2 that were both critical and commercial success. The game, inspired from Geek mythology, had an immersive storyline, beautiful graphics and
- **Grand Theft Auto** - The Grand Theft Auto III, Vice City and San Andreas were launched on PS2, Xbox and PC and became instant hits. They popularized the genre and made games seem more mature with addition of objectionable content like swear words and nudity.
