

GENERATION NOW

The Consoles of Today

Eighth Generation

The first console of 8th generation was the Nintendo Wii U launched in 2012 followed by the Xbox One and PlayStation 4 in 2013. This generation was touted as the most advanced generations of consoles yet with capabilities unseen and unheard of in consoles.

But it was going to face a lot of stiff competition from a variety of other devices in the market. Portable gaming and gaming consoles had been facing a stiff competition from the mobile gaming market. There are smart TVs, phones and tablets everywhere. The last generation of console had tried to pitch itself not only as a gaming machine but as a device which could sit in
