

This is perhaps the console which elevated the popularity of the nintendo gaming titles

Nintendo DS became Nintendo's highest selling handheld console with over 150 million units being sold. Nintendo always bring in that extra smudge of brilliance in their product design and this device was no exception.

6. NVIDIA Shield

This portable device took a slightly different approach to portable gaming. Instead of running on UMD's, diskettes, or cassettes, this device is packed with android software and can be used to stream games from your PC or Laptop through WiFi in high definition. You can play games like Metro 2033 and The Division on the go if you have a PC or a laptop powerful enough to run it. This is a rather new concept in the world of gaming and the NVIDIA shield has been well received by gamers all over the world. The NVIDIA shield is quoted by some as the inspiration for the upcoming Nintendo Switch which we shall definitely talk about later. The Shield's controller is exactly like any other normal computer
