

successors. We expect the launch of several new consoles with advanced features such as VR support in 2017. In this chapter, we will shed more light about these upcoming consoles which will most likely release in Q4 2017 or Q1 2018.

Project Scorpio

The Project Scorpio is the name given to the next generation Xbox, which is expected to launch during the upcoming holiday season in 2017. The Xbox Project Scorpio console was announced at the E3 conference in 2016. The forthcoming Xbox Scorpio will be the most powerful console ever built by the Redmond-based software giant with advanced features.

Xbox Project Scorpio will provide support for 4K and Virtual Reality capabilities. It will completely change the gaming experience by integrating premium Virtual Reality alongside 4K and HDR gaming support. According to rumors, Project Scorpio will be five times more powerful than the Xbox One with six teraflops of awesome graphics performance.

According to Microsoft, the forthcoming Xbox Scorpio console will provide the required capability to render visuals at 60 Hz. However, there are serious doubts among the gamers regarding whether the 4K games and VR will provide support for 60 Hz. The highlight of Xbox Scorpio console is that it will be the equipped with AMD's high-performance GPU, which will most likely provide support for emerging technologies such as HDR, 4K and super-fast VR experience.

Announcing the arrival of Project Scorpio during E3 conference in 2016
