

The USB 3.0 SiP

- Speech signal processing.
- Image and video signal processing
- Information technologies
 - PC interface (USB, PCI, IDE etc.)
 - Computer peripherals (printer control, LCD monitor controller,.etc.)
- Data communication
 - Wireline communication
 - Wireless communication

There are three types of SoC in general

1. SoC built around micro controller
2. SoC built around microprocessor
3. Specialized SoC, designed for specific applications

There is a separate category of programmable SoC, which contain a CPU core alongside mixed-signal arrays of configurable integrated analog and digital peripherals.
