BUILDING A PC (2017)

JUNE 2017

06

PAGE

Which component does what

The humble PC is made up of many different components. Here's a brief overview of what each component does.

12

PAGE

CPU and CPU cooler

The brain of your machine puts the heat in hot-head. And it needs a good cooler to keep running things optimally.

19

PAGE

Motherboard / Mainboard

It's the underlying fabric that holds the entire machine together. Motherboard comes in all shapes and sizes.

27

PAGE

Memory / RAM

The more you have, the better it is. Memory helps you run a lot of things at the same time.

32

PAGE

Storage – HDDs and SSDs

This is where all your sitcoms and anime are stored and you have a plethora of storage options these days.

38

PAGE

Graphics cards

This is what you need to run Crysis on max settings at 60 fps.

43

PAGE

Cabinets

Your PC cabinet buying queries end now. Here's all you need to know about them.
