

MONITOR / DISPLAY

It might not be the most important components but you simply can't do without a display.

A great and powerful CPU is all well and fine if there is a monitor to watch what it can do. Monitors or Displays are what convert performance to pleasure. A powerful PC with a bad display is no fun. In this chapter, we will tell you how to select a good one.

Key points to consider for a display

Display size is the biggest factor when choosing a monitor. While there are smaller displays, sized below 19-inch, we would not recommend you
