

PERIPHERALS AND ACCESSORIES

There's more to PC components than just your graphics cards and keyboards.

A PC might be a monster computing device but it lacks quite a few things from smaller form factors like laptops and tablets. Fret not, for there are peripherals and accessories to make sure the monster does not lag behind any of its weaker siblings.

Which accessories are we talking about? We are talking about the ones most people are accustomed to when using laptops and tablets. Let's list them down.
