

APPLE WATCH

Currently, what is perhaps the best smartwatch out there. Meet its variants, explore its features and find out what the device is all about.

The Apple Watch is a smartwatch which enables you to keep track of fitness and health parameters on the go. The device was announced by Apple CEO Tim Cook on September 9, 2014 and was made available for preorder on April 10, 2015. In India, the Apple Watch was launched November last year followed by Chile, Philippines, South Africa and Indonesia. The subsequent iterations of both the Apple Watch and the corresponding watchOS were launched in tandem with the unveiling of the latest iPhone versions.

This makes sense because the Apple Watch works quite well with iPhone. You can establish connectivity with the iPhone from the Apple Watch to
