

Talk to Siri directly from your wrist and get the work done

series 2 variant of Apple Watch is capable of delivering up to 18 hours of battery life. In addition to Wi-Fi, Bluetooth 4.0 and microphone, the Apple Watch Series 2 is embedded with direct fire speaker system.

When it comes to the Apple Watch Series 1, you get an OLED retina Ion-X glass 450 nits display with Force Touch. The OS is the same – watchOS 3. The Series 1 has sensors for heart rate and ambient light including gyroscope and accelerometer. Like Series 2, the Series 1 watches also delivers 18 hours of battery life.

watchOS 3

Apple Watch ships with watchOS 3 (http://dgit.in/watchos_3), which enables you to launch apps easily from a wide range of watch faces. Siri which is integrated works with the third-party applications as well. The watchOS has a ton of nifty features and we'll get into more details in the next chapter which is entirely dedicated to the OS and the developer framework used to create apps for the OS. The upcoming watchOS 4 is expected to launch in September 2017 and it will feature several improvements we figure.

Accessories

Apple has manufactured a wide range of bands, which you can use for your watch. There's the standard Sport Band (http://dgit.in/apple_bands) for \$49 in a bunch of colour variants. Then there's the Nike sport band (\$49)
