

GAMING ON APPLE

From how games are made to how they are played, here's a complete overview of what gaming in the Apple ecosystem is all about

We've all heard time and again that the Mac is not meant for gaming. It's been a running joke of sorts for quite some time and Mac users are pretty much looked down upon by the gaming community. There's some truth to it. If you're looking for a system to dedicatedly game on, you shouldn't be considering Apple.

However, on the mobile side of things it's a completely different story. Apple has actually worked on optimising games for their iPhones and
