How much iCloud storage is enough?

Since Photos is tightly integrated with iCloud, it is important to talk about storage requirements. You get 5 GB of free iCloud storage with every Apple account and that runs out faster than you think. And once you start using it with the Photos app, a weekend trip with your friends filled with a couple of intense selfie sessions is enough alone to fill up that 5 GB. We exaggerate but you get the picture. So what do you do?

Though not as cheap as some of its competitors, iCloud storage has become quite affordable, especially since Apple revised the pricing two years ago. About 50 GB of space costs you ₹65 per month, 200 GB for ₹190 per month and 2TB for ₹650 per month. If you are a photo enthusiast and serious about keeping the backup, the 200GB plan should do
