

rarely sees the need to go out of it. That is pretty much what keeps Apple customers buying Apple devices and services year on year. And mostly, it is on point if the cost involved doesn't bother you much. The true strength of the Apple ecosystem, along with its legitimate flaws, show through when you view the entire Apple ecosystem together – whether by being within it or without. And that is where this FastTrack comes in.

With this follow up to last month's FastTrack, we've attempted to cover everything we left out last month. That actually includes some of the best parts in the form of all Apple software along with some of the interesting hardware that we deliberately kept out of last month's edition (as they say *saving the best for last*).

By the end of this book, you may or may not be more convinced about the merits or flaws of Apple as compared to other ecosystems, but one thing is certain – you will have a completely new understanding of what they mean by “Think Different”.
