

To pay for stuff using your apple watch, all you have to do is place your wrist in front of the reader and press the side button twice

How to use it?

Apple Pay can be used in 3 ways basically

- To pay in stores using your iPhone or Apple Watch
- For in app purchases on your iPhone, iPad or Apple Watch
- To pay online on websites in Safari using your Mac, iPhone or iPad

To pay in stores using your iPhone or Apple Watch, follow these steps:

iPhone

- Place your finger on the TouchID and move your phone close to the contactless reader and your transaction will be done automatically using your default card. If you want to use any other card, move your phone close to the contactless reader without placing your finger on the TouchID, and wait for your default card to pop up on the screen. Tap it and all your cards will show up. Select the one that you want to use and rest your finger on the TouchID

Apple Watch

- Double click the side button on your watch and wait for your default card to appear on the screen. Swipe to switch cards and hold your watch near the reader to pay.
