

Samsung Chromebox

keyboard-mouse combo, it's not something that's a standard inclusion. Models from ASUS, Acer, HP and Aopen are available in the market, and offer a range of specifications and builds for your exact needs. Needless to say, this is pretty useful device type for schools and businesses that want to use an inventory of old computers that would otherwise be useless, or set up new systems at minimal costs. Chromeboxes are relatively cheaper as compared to most Chromebooks, as well as their full-fledged all-in-one counterparts, the Chromebase.

Chromebase

Think of these as Chrome OS counterparts to the now-common Mac
