

Google's Geo Services

Getting from point A to B got a lot easier thanks to Google. The world became more accessible too. Let's see how.

Google has simplified the lifestyle of people to a great extent with several productivity tools such as Gmail and Docs. The company has been silently adding new features to the search engine regularly. Moreover, the company also developed tools such as Google Earth and Maps, which help when it comes to navigating the world around you. The purpose of Google Earth is to provide a satellite view of, well, the Earth! And
