

or iOS device. Thanks to the now integrated Street View, you can also view a satellite overview of select places. The auto suggestion tool helps you to locate places easily. Google Earth also helps you learn about and locate new places via knowledge cards.

Explore Himalayas with Google Earth

To use Google Earth, head on over to google.com/earth via your browsers and select the “Launch Google Earth” button. You will view an interface with few navigation icons on the left side navigation panel. If you provide the place or location, the globe rotates, stops, and zooms in at the exact place.

You need to either double click or tap on the globe to zoom through the imagery depending on the device you are using. The Dice icon automatically
