

Analyze real-time traffic conditions on the road with Google Maps

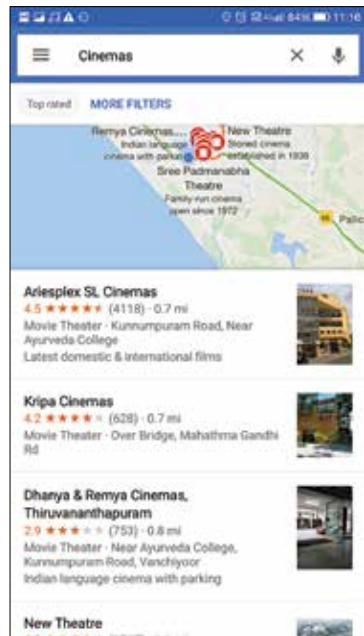

your location. It is also possible to find restaurants, cinemas, temples and shopping malls near your location by selecting the relevant option. For example, if you select Cinemas, you will locate a list of theatres with the map on the top. You can find the address, telephone number and other details, including real images of the place.

With Google Street View integration, it is now possible to view parameters pertaining to turning lanes, one-way streets and parking before travelling. The images uploaded on Google Maps are contributed by the general public including Google approved local guides.
