

ders, International space stations, visit museums, restaurants, airports, beaches and lakes using real on-street 360 degree images and navigation. It is possible to create photo spheres using the images captured with your smartphone or action camera. It is also possible to easily publish and share the content to Google Maps.

Like Google Maps, you can search for locations after the installation of the Street View app. The Featured and Explore sections help you view a wide range of trending media content in true 360 degrees with the ability to establish connectivity with a Virtual Reality headset. The tool automatically takes you into a 360 degree view of scenic surroundings.

Explore 360 degree visuals of beautiful locations with Google Street View

With the help of Google Street View, you will be able to experience breath-taking visuals of places around the world from the comforts of your home. You can swipe left, right, up or down to explore the scenes. It is also possible to integrate Google Maps with the tool. You just need to locate a place as usual and select the yellow human-type icon on the bottom right hand corner.

Google also provides a trusted badge once you have published fifty 360 degree photos, provided you meet the requirements laid down by the company. Trusted members will be eligible to get paid leads from local businesses for shooting various events.
