

images and visuals free of cost. You can navigate through stunning visuals from space stations, beaches etc without actually visiting the place. Moreover, you have the opportunity to earn from your own exclusive images provided they adhere to the guidelines. The tool is especially useful for travel companies when it comes to discovering new places for promotion purposes.

Quirks

The content in Google Street View is limited to few destinations. Moreover, you require access to high speed connectivity and Internet connections to quickly navigate through the content. Expect considerable lags if attempting to do so without one.

Competitors

Google Street View is unique because the images are mainly captured by the internal product team. Moreover, the images contributed by users undergo strict quality checks before inclusion. Street View has been banned in Austria due to privacy concerns. As of writing this, there are not many competitors for Street View but you will find plenty of third-party VR-enabled videos with similar content on YouTube.

Google Expeditions

Google Expeditions is an educational virtual reality app available for both Android and iOS. It enables you to experience immersive virtual trips when connected with a compatible VR viewer. Developed for teaching purposes, the tool helps you explore historical places and also deep dive underwater with sharks and other aquatic creatures. If you work as a teacher, the tool will act as a handy guide to demonstrate the 360 degree and 3D images to a small group of student explorers.

You can explore amazing Virtual Reality effects by integrating your Android smartphone with a Google Cardboard viewer. You can also make use of an Android device in the 2D magic window mode.

The Google Expeditions app includes over 200 curated VR imagery with descriptions, talking points and questions. However, to work with the app you need to place your phone into your cardboard viewer. You can also make use of third-party headsets but you need to install the Google Cardboard app.
