

thing from cloud hosting solutions, donation APIs to even Daydream VR and genomics. A comprehensive study of all of these services would of course be unfeasible here, (although the dev docs themselves do a pretty good job at that) but let us take a look at some of their most popular and/or disruptive products.

Android

The ‘next frontier’ since the last decade. Mobile devices have exploded over the last decade and continue to grow at a staggering pace. The size of the Android sub ecosystem itself is now estimated to be 2 billion. Imagine the power of that many connected devices all running the same product!, of course the product in question would have to be THAT good in the first place to ensure adoption.

The world of Android is vast and ever expanding
