

Popular Courses

Coursera offers a host of courses to choose from

fundamentals of financial accounting to the basics of Microsoft Word on Alison. Alison has been hailed as a booster for creative people. The portal

Alison is a learning platform for creative folks

has some of the most basic yet essential short courses for free. In case you are a freelancer looking to improve on your marketing, leadership or business attributes, Alison will be a platform you will love to learn from.

CreativeLive:

CreativeLive is a haven for the creative mind. The platform has short Live sessions with some of the best from the creative fields. For Designers, photographers, writers and artists, CreativeLive will serve as a mini-booster. With its free talks, you can learn and stay updated about the latest in their field. All you have to do is RSVP for the talks you are interested in.

CreativeLive, the TED Talk for the creatively inclined

Codecademy:

For those who want to code or learn the basics of programming, Codecademy is the portal to head to. Their collection features the basics like how to build a website from scratch to advanced courses in Python. It is the platform for web developers, designers and programmers to upgrade their knowledge and pick up a few new tricks. While some courses are available for free, the in-depth ones will require you to pay for access and a completion certificate.
