

The line between work and family can easily get blurred

You can also simply head to a local coffee shop or a communal working space which come with their own advantages as we have seen.

Paperwork... Followed by more paperwork:

In a corporate setting, you could run to Human Resources whenever you had a tax return query. Who do you turn to as a freelancer? Being a freelancer means you will probably be buried under mountains of paperwork that you need to figure out on your own. So even if you were just a web designer until yesterday, today you're a freelance web designer plus pseudo tax accountant.

You will have to learn how to raise invoices for clients, stay on top of quotes sent out to new clients, evaluate the pricing for incoming work, track expenditure and a whole lot more. There is no formal freelancing training on these aspects. So it's easy to keep the administrative work on the backburner and forget about it but refrain from doing so. Avoiding the paperwork could mean missing deadlines and payments. That isn't something you want, do you?

To raise or not to raise:

One of the toughest parts of being a freelancer is that the absence of structure
