

you. If the return period hasn't expired, then you can replace the item. If the customer contacts a seller after two months, then as a seller you can direct the customer to the manufacturer. You can even ship a replacement by arranging a reverse courier pickup and it will have a positive effect on the customer.

Amazon offers different return policies depending on the item. For instance, books get a one month return window. Electronic items are not eligible for returns. However, buyers can claim replacements in case the item is found defective. Amazon provides world-class customer service and they will initiate refunds even if an item is not eligible. However, sellers can keep in touch with the customer to find out the reason, which helps improve quality of the product.

Snapdeal

Snapdeal is a popular e-commerce provider in India. The company has improved their customer service over the past few years. If a customer initiates a return request, the Snapdeal team will manually approve and notify them with the steps required to return. The item will be shipped back to the warehouse by the buyer. It is difficult for buyers to establish contact with the seller before or after purchase for Snapdeal fulfilled items.

Snapdeal has incorporated a robust FAQ infrastructure

The Snapdeal website includes a dedicated contact page and FAQs, which will help both buyers and sellers understand the system.

eBay

eBay provides a dedicated customer service option via live chat. Moreover, sellers will be able to respond to questions via the internal messaging system. If you are selling laptops, accessories and home appliances, you should ideally provide the toll-free numbers of the manufacturer so that the buyer can contact them. Unlike Flipkart and Amazon, eBay doesn't
