

can easily get your product listed on eBay by selecting Sell option from the top navigation menu. You will have to provide the product name and select Get Started button. The system automatically provides the relevant identical products that are already listed. You will then view a one-page form, where you need to provide details of the products, set pricing and payment details. It will take few days for the listing to get approved and you will be contacted by the team for further course of action. The advantage of eBay is that you can earn badges if buyers gives you positive ratings. You can even become eBay Top-rated seller or power seller with hard work, dedication and passion.

Snapdeal

With Snapdeal, you can easily sell products in four easy steps provided you have PAN card, GST number and Current account number from any of the banks in India. You have to provide the required information on the relevant fields on the right side of the Seller (http://dgit.in/snapdeal_seller) page. Snapdeal has also established partnerships with select vendors in various locations across India for PAN/GST assistance. You can approach them to simplify the process. If you submit the required documents, they will take care of all the complicated work including training and guidance.

Shopclues

You should obtain PAN number and GSTIN number before beginning. The PAN number should be in the name of your e-commerce business. If your business is part of sole proprietorship, you need to submit PAN number with your name. You need to register, provide the required details, upload products to the system by selecting Start Selling (http://dgit.in/shopc_seller) button. You will receive a notification when a buyer makes a purchase. You will receive payments after the item has been delivered to the buyer and also after the expiry of the mandatory return window. Shopclues has established partnerships with several service companies with which you can boost the sales.

If you sell via ecommerce companies, you will be provided with special packages in various sizes using which you can ship products to buyers. Moreover, you can easily print address labels using the tools provided by the company. There are quite a few other online stores you can go for: **d**
