

indexes automatically synced with your Eloquent records. Currently, Scout uses the Agolia driver. However, designing a custom driver for search is not the toughest job. You can choose to use Scout as it is or extend it using your own search implementations.

Socialite

While Laravel makes provisions for the more traditional and typical form based authentications, it also takes care of one more important aspect. It provides for an extremely simple as well as convenient way to authenticate with OAuth providers using Laravel Socialite. At this point in time, Socialite supports authentication with Twitter, Facebook, Github, Bitbucket, LinkedIn and Google. Using Socialite helps developers steer clear of writing that dreaded code for social authentication.

Laravel Image Package

Think of a regular shopping website that you patronise on a regular basis. Can you even begin to fathom the number of photographs that they have on there? Now picture having to deal with adjusting thumbnails, colours and other photo editing that might be needed. That is where the Laravel Image Packager comes to the rescue.

Debug Bar Package

Co-owner of Fruitcake studio, Barry vd. Heuvel created one of the two most sought after packages offered by Laravel. Presenting, the debugger bar. Laravel themselves call this package a cornerstone feature of theirs. This package is simple yet essential for anyone looking to keep tabs during application development.

Laravel Schema Package

While we are on the topic of worksheets and tables, Laravel's schema package is more than worth a mention. We've already established that the human race depends on electronic worksheets. From students, to home-makers and to people running big organisations. The world is run by excel sheets. With this package, creating database tables are made easy. Database functions are available in this package which makes it an attractive one.

Laravel IDE Helper

IDE stands for Integrated Development Environment. It is a software appli-
