

Getting started

Learning the ropes, getting a hang of things, learn a few of the most important toolbars available to you. Also, look at the templates provided to get you started

Asset Panel

The Asset Panel is one of the most important tool at your disposal. It's going to save you a lot of time. So what are Assets? Assets are anything you create in your XD file. It could be a colour, character style or a symbol. The colour or gradient of a text or a symbol; the character style includes the font type, size, character and line spacing; symbol can be a shape, or shape with colour or text or even a logo or an icon. Once you create these, they can be added to
