

Open the Layer panel and double click on the artboard icon to view all the objects on that artboard

and the objects are under that grouped layer. Constructed symbols are also a layer, with all the objects constituting the symbol as layers under the symbol.

You can also group objects from the Layers panel. Select the objects by pressing the Shift key, right click and select group. You can also duplicate, export, make into a symbol and delete a layer from the context menu opened by right clicking. To rename a layer, double-click the name of the layer and type a new name. Press Tab to continue editing the next layer or artboard name. There may be some elements on an artboard that you may
