

On the welcome screen, select a preset size or select Custom and specify the screen size in pixels. Or select Custom and enter the size in pixels. Let's select iPhone 6/7.

A simple welcome screen to get you started

You will see your artboard (the white box) on the screen. To add another artboard, press A and select the preset from the options on the right. This will add another artboard adjacent to your last artboard. Make sure that no artboard is selected when you press A. Selecting an artboard and pressing

When you start a new project
