

tutorials. They can be found at <https://helpx.adobe.com/xd/how-to/web-mobile-app-ui-ux-design-basics.html>. You can simply go to the Adobe website, go to support, under all products, select XD and then go to tutorials. Click on any tutorial and you will find the sample files. It will be saved as the 'Ginchy _practice_file'. Open it and you will designs for various screens like kiosk, website, mobile, app and tablet. Let's focus on kiosk for now. Select the Homepage Kiosk artboard from the Layers panel and press Ctrl + 3 (this allows you to zoom in to the selection). Move upwards in the order on the Layer panel and you will see the design flow.

Homepage kiosk → First Kiosk → Sign up Kiosk → Search Screen → Search Result Kiosk → Search Result Kiosk 2 (the Search Result Kiosk 2 takes you to the product page from the search page).

Look at the screens from left to right. We will try to emulate on those lines

So let's say you are creating a design for Digit FT where one can sign up, search for a term, view the result and then go to that particular page. That's the flow. So what are the artboards required?

1. Login/ Sign up artboard
2. Homepage artboard with search feature
3. Search result
4. Target page

Login/ Sign up Artboard

As an example we will create the Login screen together. You can just repeat
