

DIY Part 2- Just Playing Around

Exploring further - using repeat grids,
colours and effects.

Now let's create the homepage. On the homepage, you would have several headlines with a brief description of the content below it and maybe an image next to it, date and a heart to bookmark it. So create a new artboard with the title. Go to Assets panel and add in the header symbol we had created earlier. Align it to the artboard-use the square layout to align it quickly.

Create a text section header like Top Stories or Featured Articles etc. Then using the square tool, create a space where images are to be inserted,
