

DIY Part 3 - The Endgame

Test your design in the prototype window, preview it on desktop and mobile and record it

You are almost at the finish line- keep the champagne on ice and ready to pop.

Now let's see how the design really looks. Let's connect the artboards together and create an interactive design flow and prototype. We have created additional two artboards or screens- Digit-Search Term and Result and Digit- Search Target Page. So we have a total of four screens.

First, you need to go into the Prototype mode. On the left side, near the top you will see the Design and Prototype tabs. You are currently in the
