

Learn the process associated with the Adobe XD review mechanism

also possible to roll back the resolved comments to the previous state. The Update Link option helps you to modify the prototype without altering the shared link. You can create a new link by selecting New Link option. the review can be closed by unchecking Allow Comments option.

If you are a reviewer, you should login with your Adobe credentials. You also require a password if you need to open a protected prototype. The first step is to open the comments panel by clicking the Show Comments icon. You can also sign in as a guest by providing the name and entering the CAPTCHA code.

Adobe XD provides tools such as Hotspot hints and Full-screen mode to enhance the user experience. The Hotspot hints indicates interactive elements that are required to be addressed by the reviewers. However, the hints won't appear if the author had disabled during the sharing process. The reviewers can make use of the full-screen mode, which enables you to view all the design elements with accurate perfection.

You can start adding comments at the bottom of the comments panels. The new line can be added by using a combination of Shift+Enter. It is also
