

Setting it all up

Let's start the prep and set up the environment. Learn what software you will need to build a custom ROM

Installing a custom ROM does have its allure, doesn't it? It is probably one of the biggest joys of Android. The 'open source' nature means you can probably find a custom ROM or build one that fits your exact bill. Perhaps you want a ROM that includes apps or services that come built in with devices from another manufacturer, or maybe your device is seriously lacking battery power. Regardless of what your reasons for installing a custom ROM are, you need to have all the necessary tools to get started. So here's a rundown of all you'll need to do exactly that.

Recovery

Any and all Android devices are made up of different pieces of software - radio, bootloader, recovery, as well as system. Every single time that you
