

What's under the hood?

A look at custom ROMs and their features. Are you sure you are not already using a custom ROM? Let's find out

Back in the good old 90s, when we broke something, we would fix it. But now, what we break, we replace. And this seems to be especially true of cell phones. Come to think of it, when it comes to cell phones, we do not even wait for them to be broken or lost. They usually get replaced by a newer model for primarily 2 reasons - aesthetics or features. If it's the latter that interests you more than the former, you might particularly enjoy this edition of Fast Track.

What if we told you, that every time Android came out with a system upgrade that isn't compatible with your phone you need not consider
