```

Adding Changelog Option To SecSettings

Open res/values/strings.xml and add the following codes

```

• <string name="changelog_title"><b>Changelog</b></string>
• <string name="changelog_title_summary">View recent
  changes in ROM</string>
• <string name="changelog_loading">Loading
  changelog...</string>
• <string name="changelog_error">Unable to load
  changelog</string>
• <string name="changelog_unknown">Unknown</string>
• <string name="changelog_version">Version</string>

```
