

- ```
<TextView android:textSize="12.0dip"
android:textColor="#ffffff" android:gravity="center _
vertical" android:id="@id/knoxCustomStatusBarText"
android:visibility="gone" android:layout _ width="wrap _ con-
tent" android:layout _ height="fill _ parent" android:includeF
ontPadding="false" />
```

Next, go to `keyguard_status_bar.xml` and search for

- ```
<FrameLayout android:layout _ gravity="center _ vertical"
android:id="@id/system _ icons _ container" android:layout _
width="wrap _ content" android:layout _ height="@dimen/
status _ bar _ height">
```

And replace it with

- ```
<FrameLayout android:layout _ gravity="center _ vertical"
android:id="@id/system _ icons _ container" android:layout _
width="0.0dip" android:layout _ height="0.0dip">
```

## Customer Service Code (CSC)

Moving on to some advanced stuff, let's look at Customer Service Code (CSC). This code ensures that you are in compliant with your network operator and have signal on your phone. Modifying this code allows you to unlock features that are not available via the stock ROM. Go to `system/csc` folder and open the `others.xml` file with Notepad++.

Add in the following lines of code to the file

### To enable camera shutter sound toggle in camera settings-

- ```
<CscFeature _ Camera _ ShutterSoundMenu>TRUE</CscFeature _
Camera _ ShutterSoundMenu>
```

To enable realtime network speed toggle in settings-

- ```
<CscFeature _ Setting _ SupportRealTimeNetworkSpeed>TRUE</
CscFeature _ Setting _ SupportRealTimeNetworkSpeed>
```

### To enable native call recording-

- ```
<CscFeature _ VoiceCall _ ConfigRecording>RecordingAllowed</
CscFeature _ VoiceCall _ ConfigRecording>
```
