

DIY Projects

Show what you know by completing these fun and useful programming projects

So far, in this FastTrack, we've covered a lot of ground! Don't fear if it is not all clear, after all that's why this chapter is here!

Knowledge is not power, applied knowledge is power! That said, it is not easy to find good uses of skills. Though this is beginner level, we're not going to insult your intelligence by building 'Guess the number' games. In fact, since this is a Do It Yourself Chapter, *we* are not going to build anything - you are!

This chapter is written as a DIY guide, not a tutorial or follow-along article. In an effort to take it up a level (of abstraction), we will not be providing you with finished code. This DIY chapter will only be useful if you actually want to learn python. Although most programming 'DIY' articles are structured to reduce the effort of the reader, we feel that it defeats the
