

Custom loop - Parts

The number of parts available on a closed loop custom liquid cooling kit is too damn high!

All-In-One liquid cooling systems are a great solution for users who want to opt for liquid cooling without getting their hands dirty. They are simple closed loop systems that aren't much of a hassle while setting up. You don't need to spend hours to build the entire cooling system while hoping that none of the parts fail. With RGB lighting, your AIO cooler might look amazing but it won't be a match to what an open loop custom liquid cooling system can achieve. With the freedom to create custom loops using hard tubes and various coloured
