

The Unity Project Window

hierarchical list. If you are looking for individual assets, you will find them in the right hand panel. There are icons that indicate the type of assets – material, script, sub-folder, etc. You can resize these icons by using the slider, and if at any point, you move the slider to the extreme right, they will be replaced with a hierarchical list.

Game View

Interacting with your game in the Game View will be representative of your final product. This view is rendered from the camera (or cameras)
