

also has a set of hotkeys that help simplify things for you. When you see a command that has Ctrl/Cmd as part of its keystroke, it is an indicator that the 'Control' key needs to be used on a Windows System and the MacOSX needs the 'Command' key. Mac also has a number of shortcuts on its trackpad that help navigate the Scene View in Unity. Learning these hotkeys will tremendously boost up your productivity, and to make sure that you pick this up, it is a good idea to avoid using the mouse like the plague, while you are working on Unity. Almost all of the things that you want to do can be accomplished through the deft use of these hotkeys.

WINDOW
